

HURRICANE PLAN

Vessels under care with Marine Professionals, Inc. are subject to the following Hurricane Plan. When Hurricane Warnings, or Watches are issued in the area of the vessel's mooring within Dade, Broward and Palm Beach Counties MPI will adhere to the following process.

- * Vessels are removed from moorings that are not considered safe harbor, and moved to locations which are considered as such. This may include inland locations and/or dry docking.
- * All cleats, lines, ropes, chocks winches are checked for strength. Lines are doubled up fore and aft, and chafe gear is installed where necessary.
- * Vessel canvas and Bimini Tops are removed and stowed.
- * Antennas and like items are secured.
- * Vessel's records are properly placed in a watertight container.
- * Batteries are checked to insure proper bilge operation.
- * All cockpit drains are cleared.
- * Tape is used to cover any cracks or openings on the vessel.
- * Vessel's lines and fenders are secured where necessary. Lines are fastened for hurricane protection.
- * Anchors are set where appropriate.
- * Tender and Personal Water Craft (PWC) tie downs are checked and doubled up if needed.
- * All loose items and gear are removed and secured inside the vessel.
- * Vessels are checked regularly during foul weather, where permissible, and checked following the passage of a significant weather event.

NOTE: All vessels under the monthly care of MPI will have first priority for Hurricane prep. MPI does NOT assume any responsibility or liability for ANY damages caused to your vessel prior to, during, or after the storm. MPI is ONLY prepping the boat to the best of our ability to help minimize damage.
